

Testimonial for Kedar Desai, Adezines

Kedar Desai worked for Roundpeg Research in May and June 2009 on a translation from English to Gujarati. The translations were of a set of short questionnaires about leg fracture and work status for a large international study and the process included several steps.

We were extremely pleased with the quality of Mr Desai's work. He met all the deadlines that were set and always responded to enquiries quickly and in a courteous way. He also helped us establish contacts with other Indian translators quickly, which would otherwise have been a lengthy process. It was a real pleasure to work with him and we would not hesitate to work with him again.
